The Presentation of Enterprise Content Management Solution

Automated Smart ECM

Presented by: ASL

March 2026

Agenda

1. Major Features
2. DMS Functions and Features
3. Deployment
4. Licensing Scheme
5. Q&A

Major Features

Folder Level Access Rights

- Authorize different folder permission to respective AD group
- Custom metadata for different folder

Document Upload & Scan

- Support import electronic document into the system
- Support scan paper files into the system

Document Online Preview

- Support PDF file online preview page by page
- Support watermark

AI assistant

- Search document by AI assistant
- Summary document by AI assistant

AI-powered Search Capability

- Search index values of document
- Search keywords in document
- Use Natural Language to search document

■ OCR & Data Extraction

- English, Traditional/Simplified Chinese full text OCR
- Automatically data extraction and metadata filling
- Confidence Score calculation

■ Document Collaboration

- Workflow Approval
- Batch processing execution regularly
- Retention and Reminder

■ System Auditing

- Role-base functionalities
- Transaction based audit log (What user do during a period)
- Search Audit Log
- Audit log Report

■ Role-based User Management

- Role mange functions
- Group control permissions
- User belongs to specific role and group(s)

Folder Level Access Rights

- Multiple layers of document folders for categorization/classification in the database
- - Categories are organised in a tree structure similar to file systems
- - User interface for navigation of the tree structure

- Metadata fields are user-defined per folder
- Group base folder level access control

Role-based User Management

- Role-base functionalities
- Transaction based audit log (What user do during a period)
- Search Audit Log
- Audit log Report

The screenshot displays the 'Role-based User Management' interface. On the left, the 'Groups' section allows organizing users by responsibility areas. It lists three groups: 'Compliance' (Manages policy adherence and audits, 0 members), 'Finance' (Handles LOB billing and contracts, 0 members), and 'Operations' (Oversees workspace). Each group has an 'Edit' button and a trash icon. A 'New group' button is at the top right of this section. On the right, the 'Users' section allows assigning roles and aligning users with groups. It lists three users: 'Document Admin' (docadmin, Document administrator, Finance), 'Linda Tsang' (linda, System administrator, Compliance, Finance, Operations), and 'System Admin' (sysadmin, System administrator, Compliance, Operations). Each user has an 'Edit' button and a trash icon. A 'New user' button is at the top right of this section.

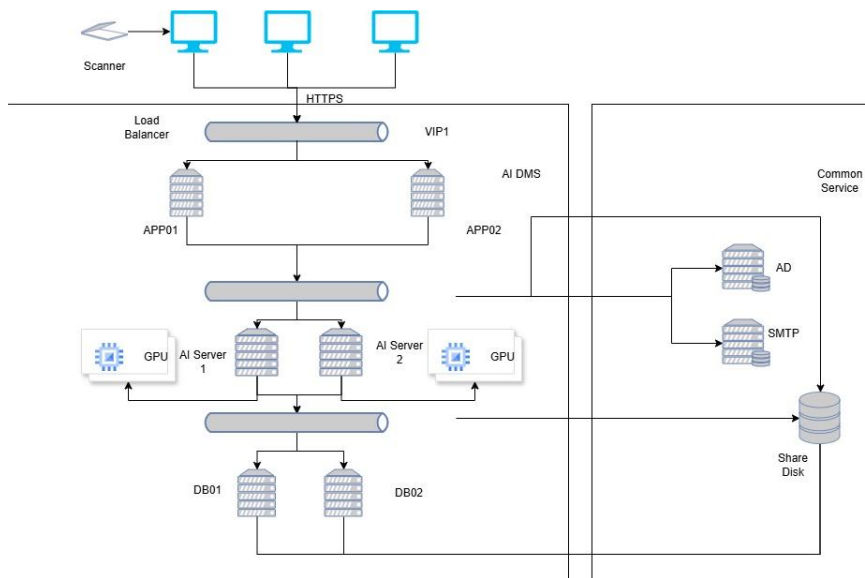

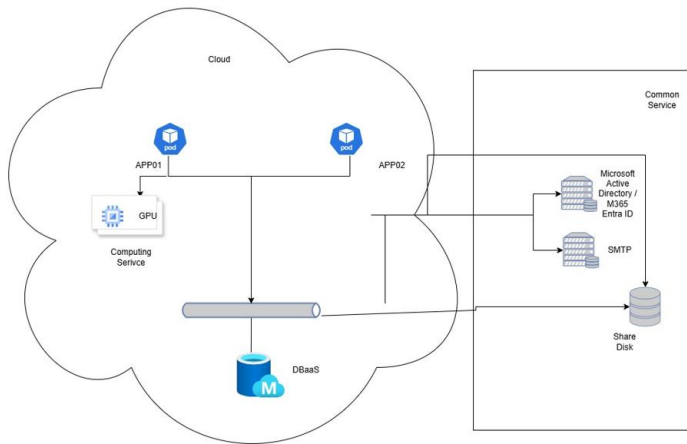

The 'Edit user' modal form is shown. It includes a 'Close' button at the top right. The form contains three input fields: the first contains 'linda', the second contains 'Linda Tsang', and the third contains a masked password '.....'. A 'Show' button is next to the password field. Below the inputs, a message states: 'The current password is pre-filled. Update the field to set a new value.' Below this is a dropdown menu currently showing 'System administrator'. Under the 'Groups' section, three checkboxes are checked: 'Compliance', 'Finance', and 'Operations'. At the bottom right, there are 'Cancel' and 'Save' buttons.

Deployment

- On-premises deploy

The solution can deploy to customer provide hardware platform.

GPU with at least 24GB vRAM is need to run AI-related function and features.

- Hybrid Cloud deploy

The solution can deploy to government cloud or other public cloud in container/K8S.

AI-powered computing subscription is need to run AI-related function and features.

Licensing Scheme

ASL provide 2 pricing schemes for purchasing the solution:
